## AVIC-INTL PROJECT ENGINEERING COMPANY

Address: 4/F.CATIC PLAZA, No.18 Beichen Eastern Street, Chao Yang District, Beijing 100101 P.R.CHINA

To whom it may concern

### Reference Letter for Riaan van Zyl (Transmission Consulting Services TCS)

New road, highways and freeways usually cross existing power line infrastructure. These lines have to be adjusted to meet the new road/freeway crossing statutory vertical and horizontal clearance limits.

We herewith confirm that Riaan van Zyl, an overhead lines specialist, at Transmission Consulting Services (TCS) successfully designed, managed and implemented a 66kV *AVIC—INTL project engineering company*.

The projects are normally complex in nature due to the work on existing lines and limited availability of power interruptions/outages.

TCS has successfully completed these two projects during 2023.
