TO WHOM IT MAY CONCERN

Dear Sir/Madam,

RE: Reference Letter – Hosea Kutako Airport Freeway Interchange Transmission Line Relocation

We, SMEC Namibia (Pty)Ltd, herewith confirm that Mr. Riaan van Zyl from Messrs. Transmission Consulting Services (TCS) was the lead design engineer and project manager on the 66/132kV Hosea Kutako Airport Freeway Interchange Transmission Line Relocation project. This complex project, crucial for the project initiated by Namibia's Roads Authority (RA) and NamPower as critical stakeholders, demanded meticulous planning, expertise, and execution, all of which were successfully demonstrated by Mr. van Zyl and TCS throughout the project's lifecycle.

Mr. van Zyl's dedication and leadership were instrumental in ensuring the project's success within scope, schedule and budget. His ability to effectively manage resources, mitigate risks, and maintain open communication channels with stakeholders significantly contributed to the seamless execution of the relocation project.

Moreover, Mr. van Zyl's technical proficiency and problem-solving skills were evident in overcoming the project's challenges, ensuring its timely completion without compromising on quality.

For more information, feel free to contact our office.

Yours sincerely,

Allan Vivier
Project Engineer
